LIVING WALL

UV rated indoor / outdoor living wall panels are designed in the USA by our in-house living wall artisans. Panels come in large 20" X 40" metal grids.

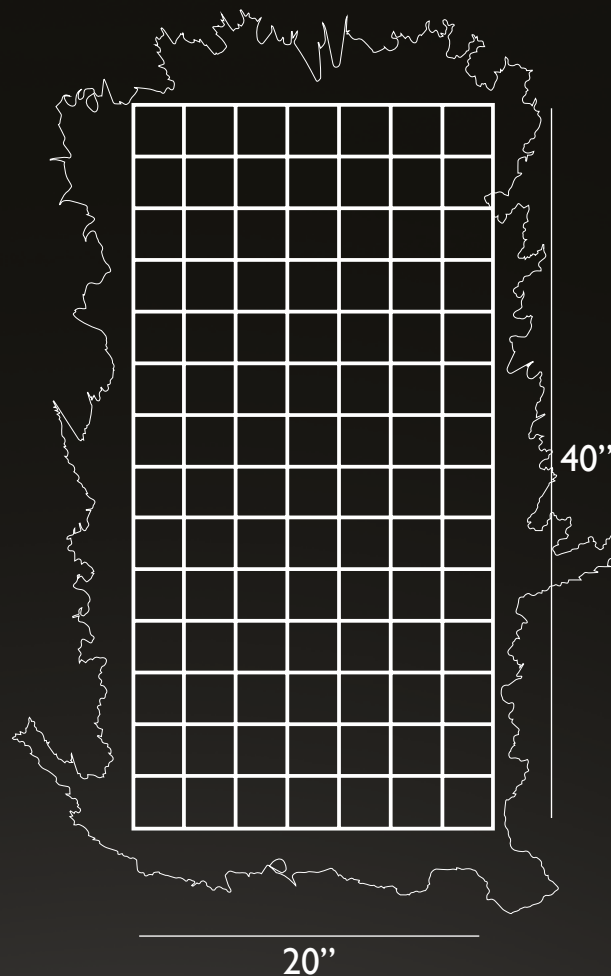

The complete design is made up of dozens of individual plant styles that are singularly attached to the metal grid one-by-one.

Each individual plants is up to a foot long and creates a depth perception that makes this one of our most realistic looking products.

Our Premium Living Wall collection can be mixed and matched with other items from this collection to create a unique design.

This product is virtually maintenance free, resilient to any weather and adheres to practically any surface.

Dimensions:

Living Walls

ASPEN

20 X 40 INCHES

Each living wall panel is hand crafted and designed to not have a repetitive pattern, but rather an organic composition that is singularly attached to the metal grid one-by-one.

The back of the panels are wrapped in sturdy, geotextile fabric which helps block light passing through to create a fuller look.

Panels can be installed individually or can be mixed and matched for a more realistic look.

HEDGE MATS

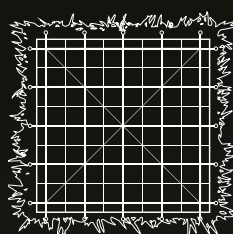

Our elegant hedge mats come in a standard 20"x20" panel. UV-rated properties are infused into the polyethylene during the manufacturing process so it can be installed indoors or outdoors and withstand extreme climates.

Designed in the USA, our in-house living wall artisans are dedicated to the innovation of the most realistic products possible. Each hedge mat panel is hand assembled to create a repetitive pattern for a soft, realistic appearance.

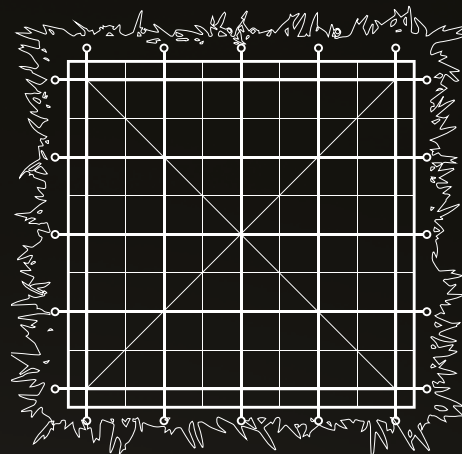

Each panel covers 2.78 square feet and features an Easy-Click interlocking system so that they can be effortlessly fastened side-by-side using our "Interlocking Tool".

The backing is made of a sturdy, polyethylene grid that is very flexible and can be adhered to practically any surface whether flat or contoured. The thick density of the leaves used within these panels give it a lush and full look that creates a continuous pattern to simulates live hedges.
